

Hikvision Temperature Screening Solution for Office

Solution Introduction

The Solution uses thermal camera to efficiently detect the person with elevated skin-surface temperature. For the office employee who come to office to work, they can check the temperature themselves by watch the digital signage without any touching measurement. And the digital signage can display the temperature screening info and other info like notification at same time.

Digital signage can be divided into several sub-screen to display temperature screening and other information as demand

- Place the digital signage in office lobby to display the temperature screening
- Make sure the employee can check the temperature for him\herself

- Effective self check of temperature screening
- Easily Connected by RJ-45

Solution Components

- Thermal: 160 × 120, lens: 3 mm / 6 mm
- Optical: 2688 × 1520, lens: 4 mm / 8 mm
- Accuracy: ±0.5°C
- Measurement range: 30-45°C
- Embedded **audio alarm** for abnormal temperatures

DS-D6043FL-B/S

Size

43\55 inch

Resolution

1920*1080

Brightness

400\450(cd/m2)

CPU

4-core Cortex-A17@1.8GHz

Network

Wired, wireless Wi-F, 3G/4G

Touch

Optional

Interface

AUDIO IN×1,
AUDIO OUT×1
RJ45IN×1
USB2.0×2
TF card × 1
